

AGILON[®] MOBILE

MATERIALS MANAGEMENT ANYWHERE, ANYTIME

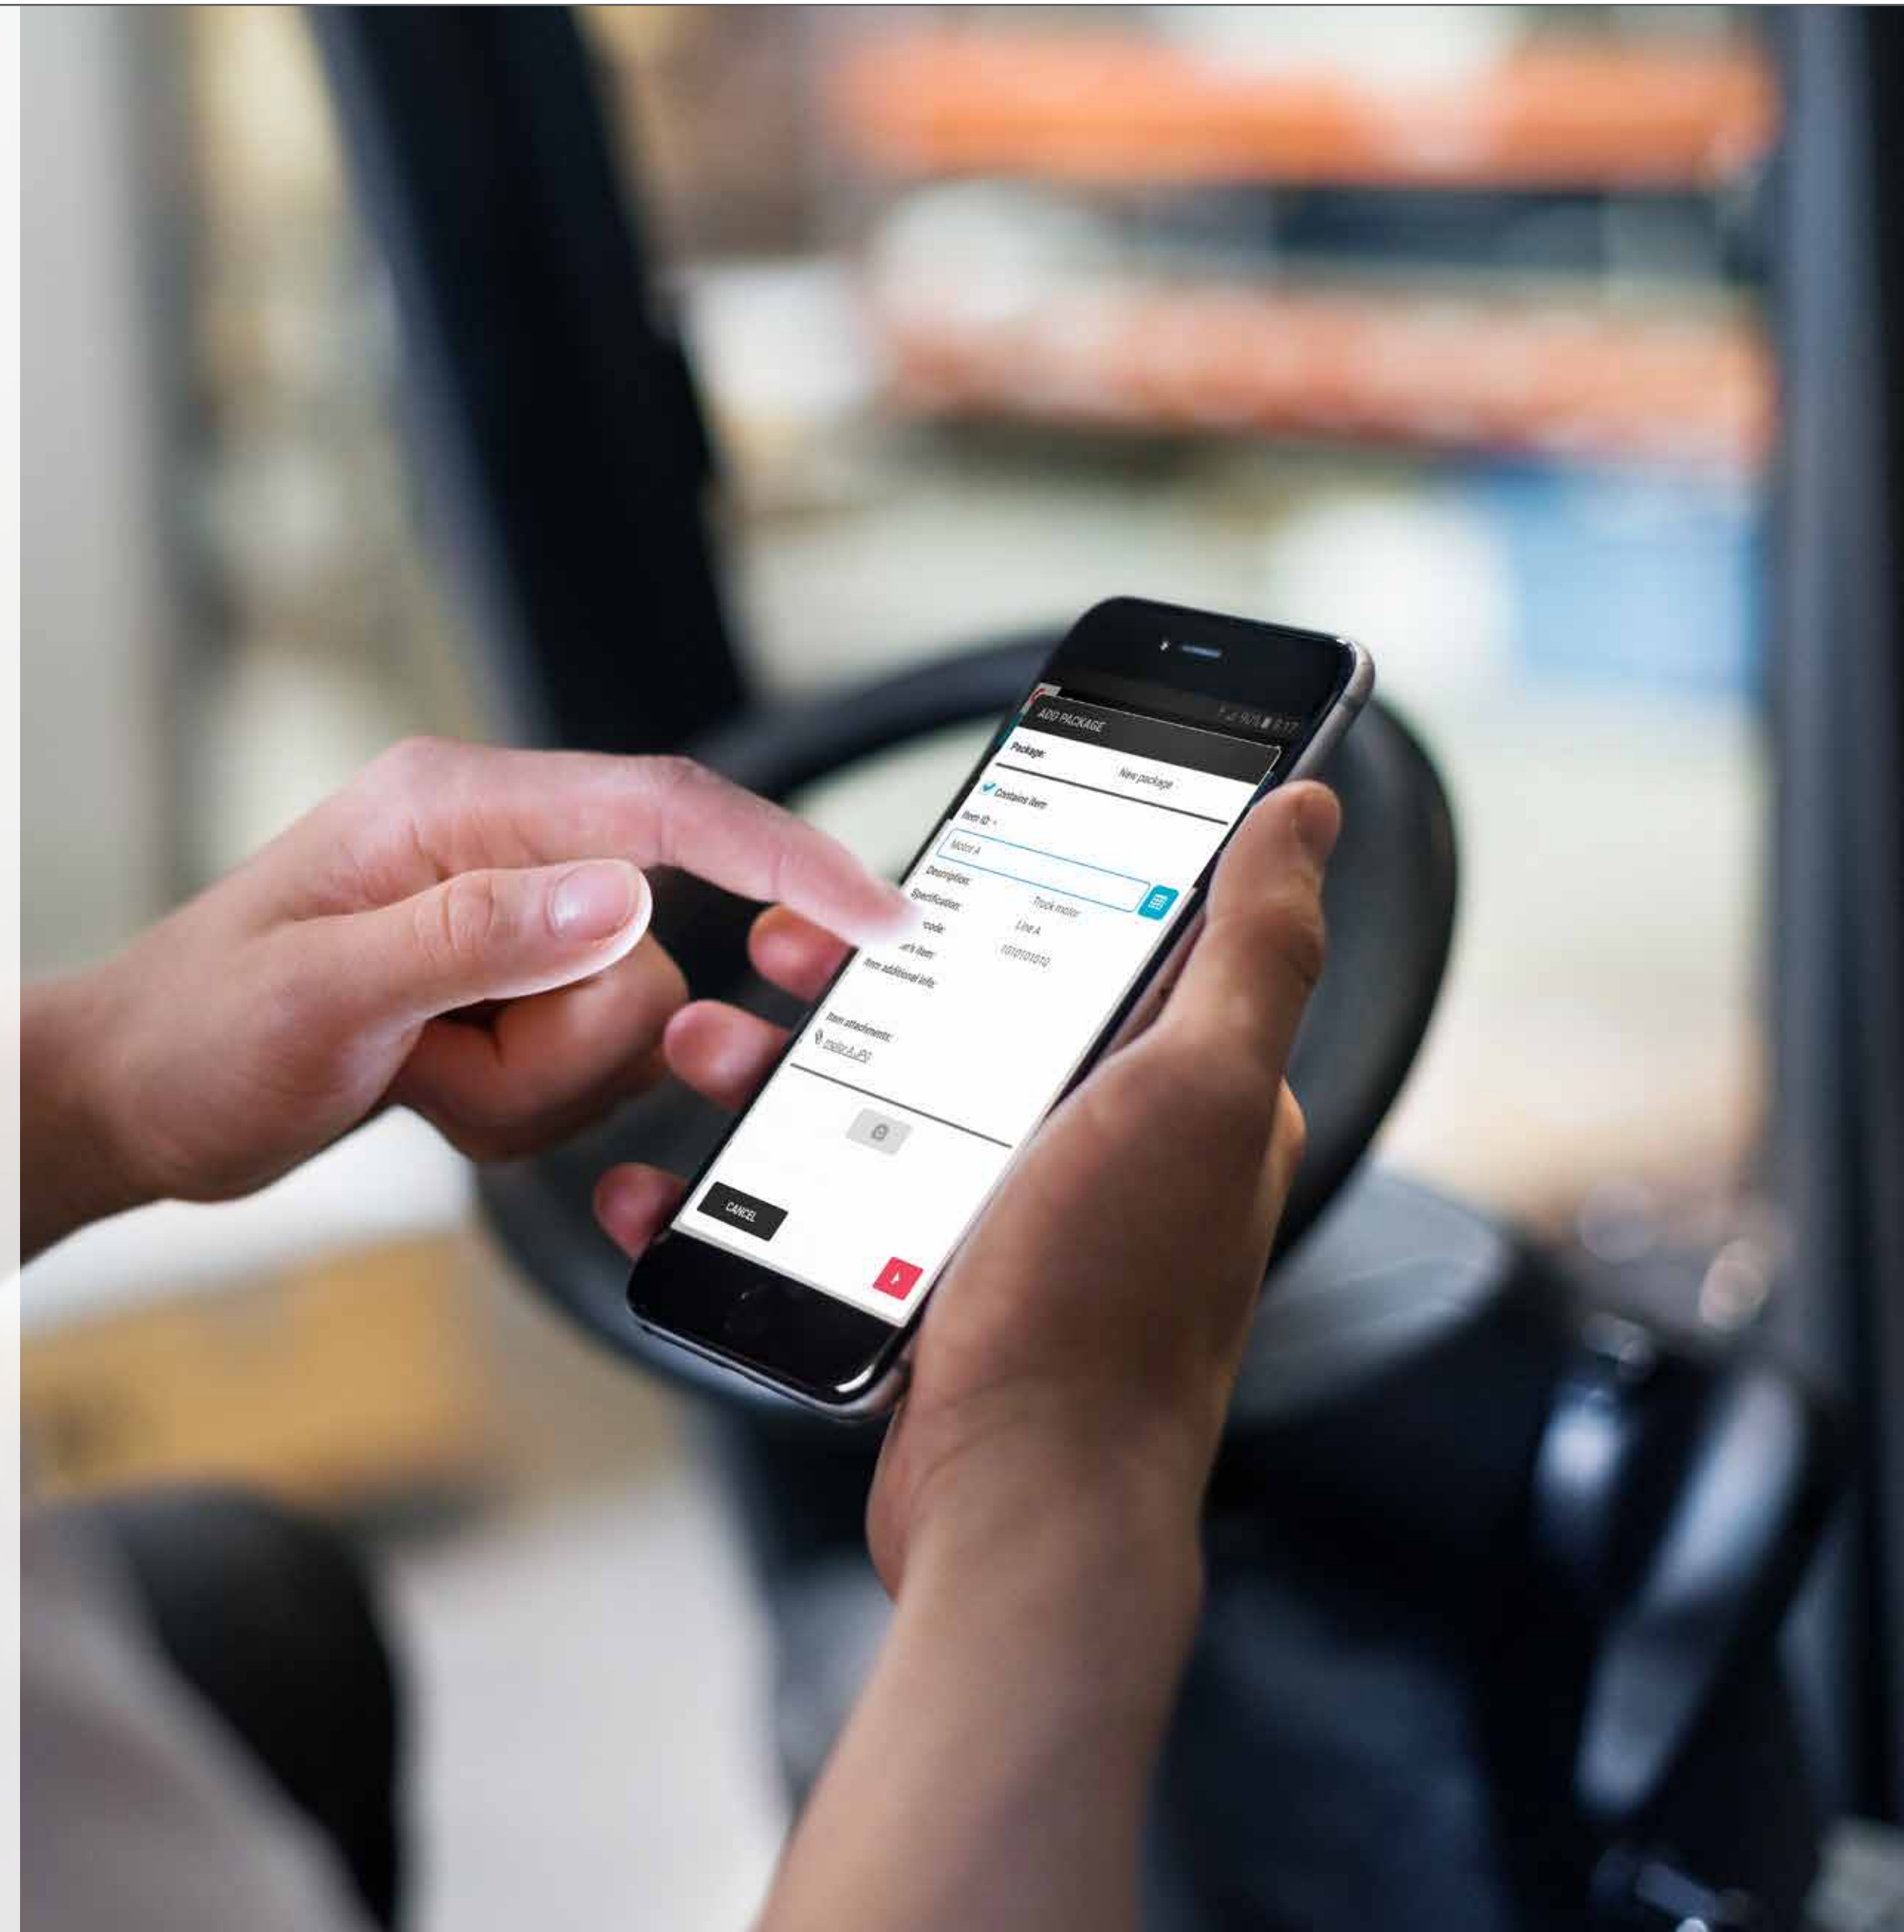

● ○ AGILON® MOBILE: NOTHING BUT ESSENTIALS FOR INVENTORY MANAGEMENT

Agilon® Mobile helps you to manage material and information flows with an easy-to-use web portal optimized for mobile devices. It has the features you need to speed up your daily materials management routines – for example, check item availability and perform transactions.

An additional service for the Agilon system, you can use it to manage storage outside Agilon with a cell phone, tablet or PDA device. This allows you to include heavy and bulky materials in Agilon materials management.

It can also be used as a stand-alone solution for managing warehouse transactions and materials. Even a small business with no actual inventory will find it suitable to manage any material flow and keep track of material transactions.

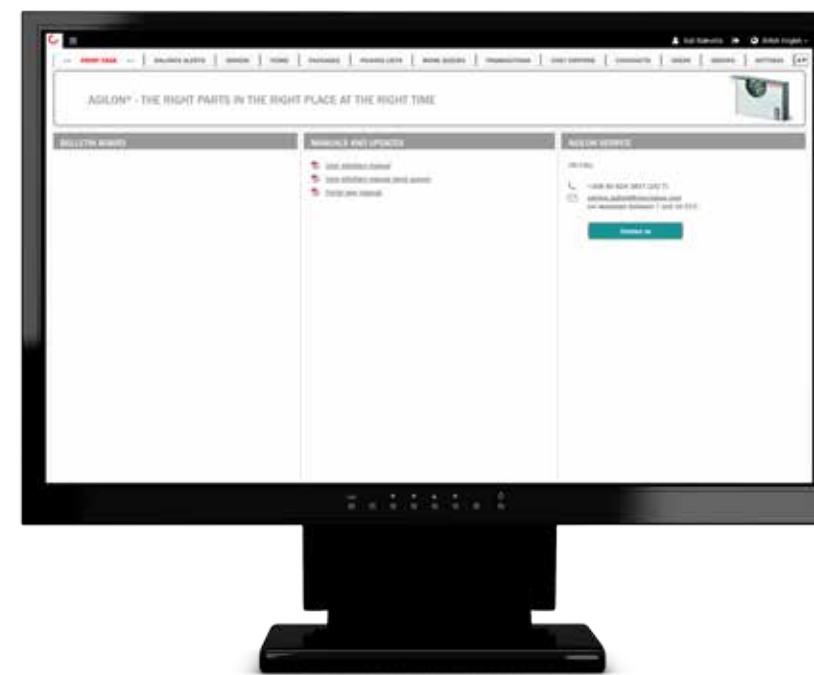

AGILON PRODUCT FAMILY: THE RIGHT TOOL FOR EVERY MATERIALS MANAGEMENT TASK

Agilon is a comprehensive product family that includes the physical system and services needed for a cost-efficient and traceable material flow.

AGILON

To store materials in a modular, space-saving parts-to-picker system that tracks all transactions.

[READ MORE](#)

AGILON PORTAL

To manage items, reorder points, user settings and keep track of all transactions – anytime, anywhere. Use **AGILON REPORT** for easy-to-follow data summaries.

AGILON MOBILE

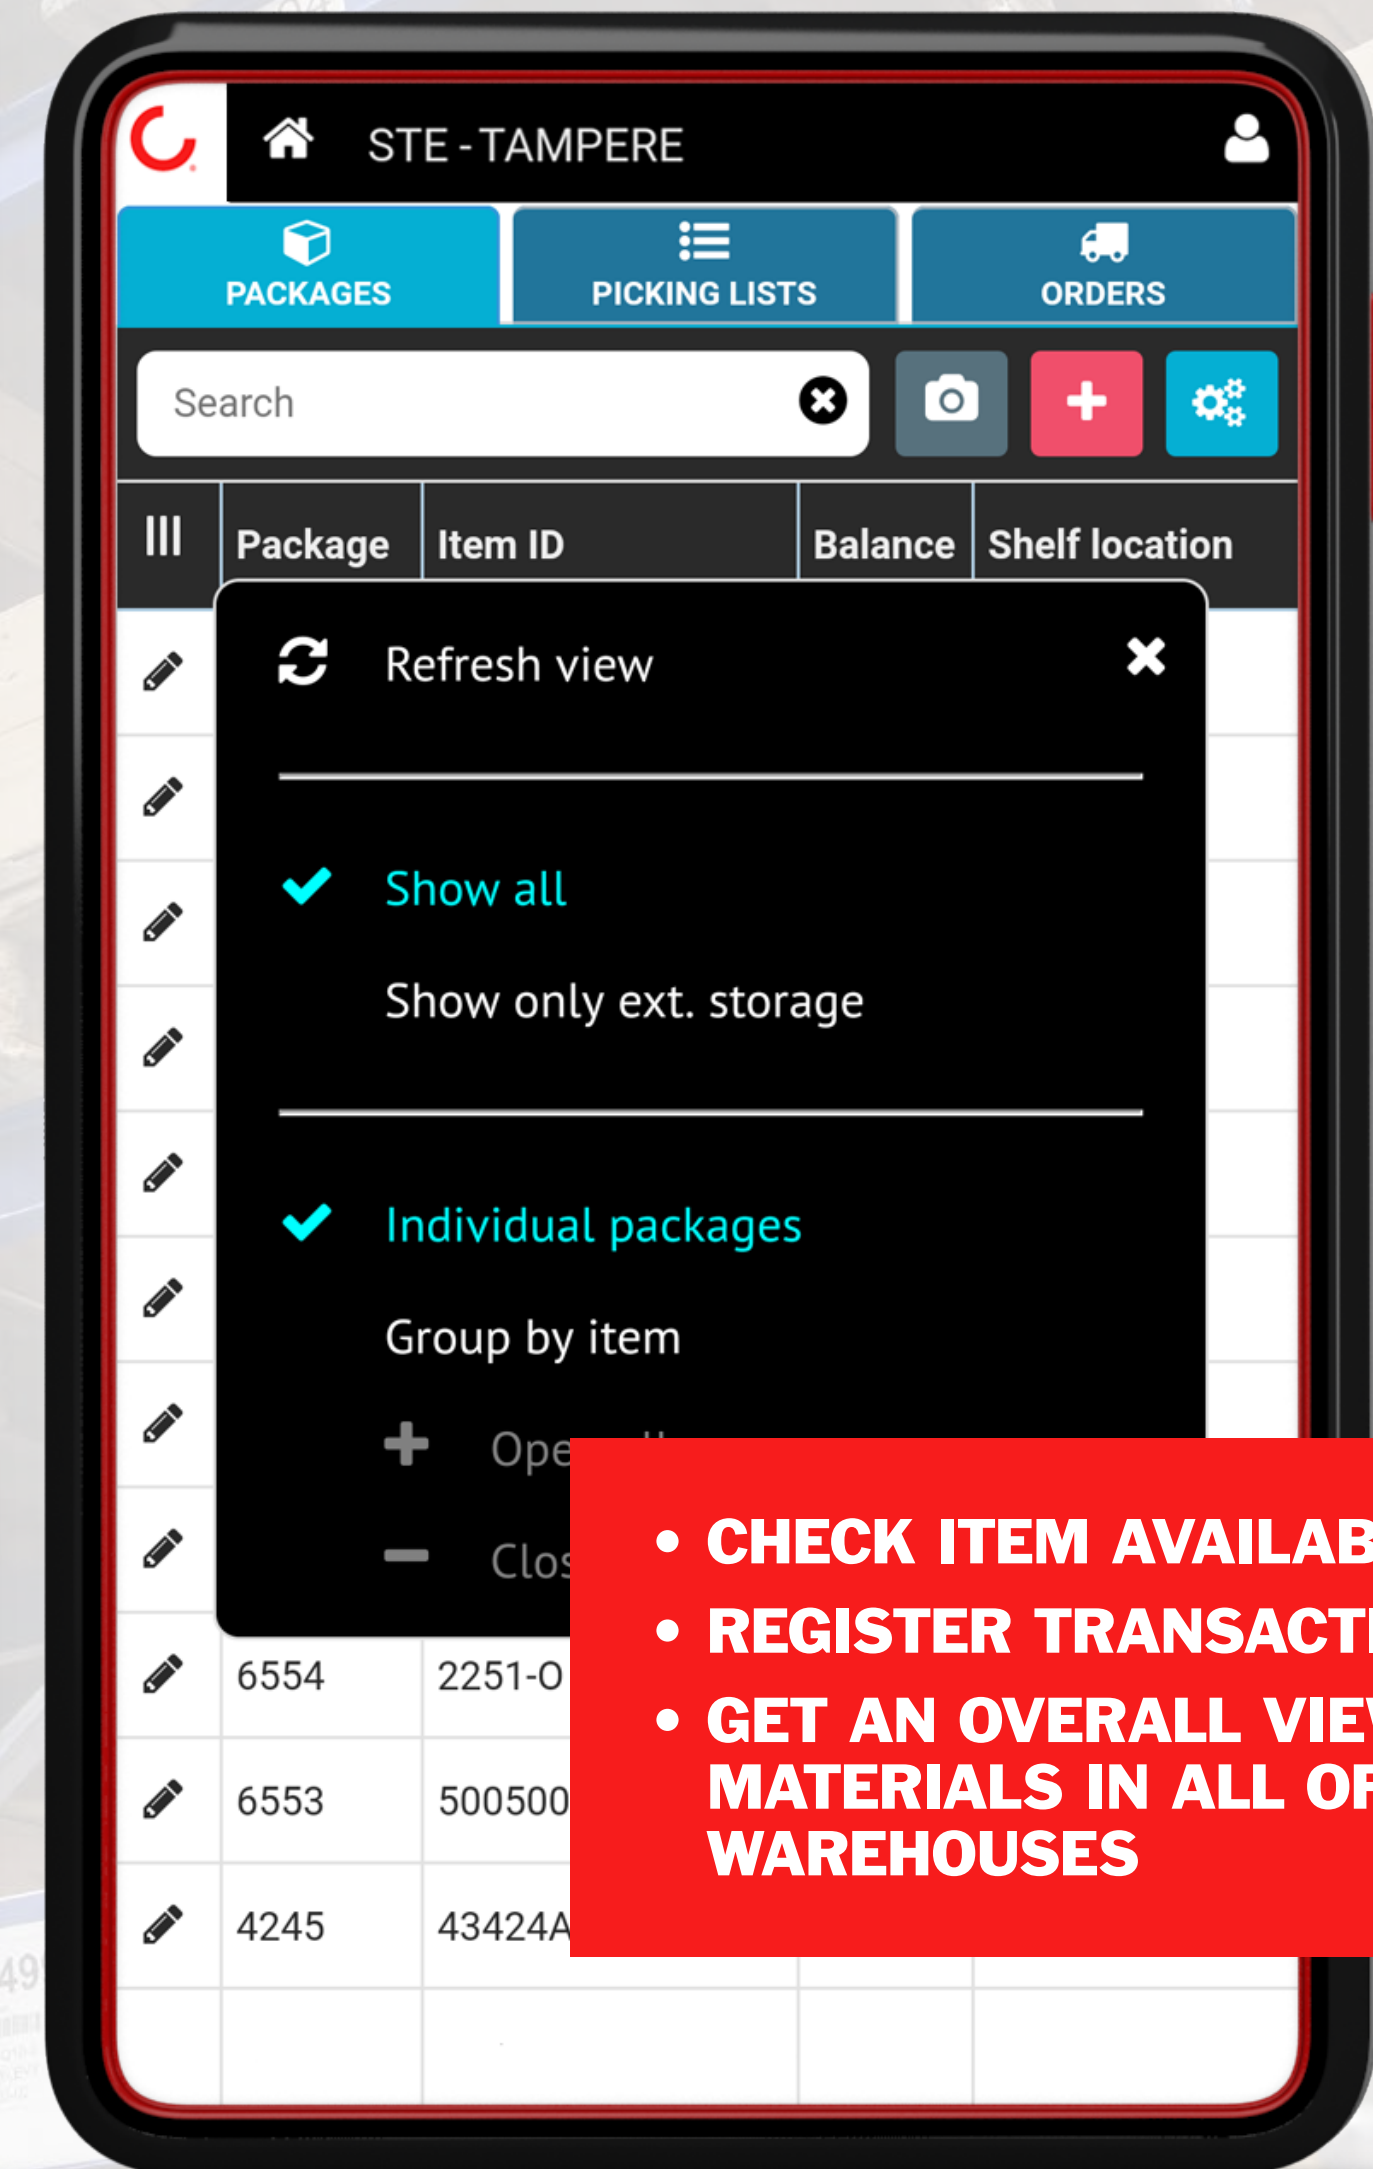

To manage any material outside Agilon with a mobile device.

REAL-TIME MATERIALS MANAGEMENT INFORMATION WITH YOU ANYTIME, ANYWHERE

Warehouses and materials are not always close while taking care of your everyday duties. Agilon Mobile connects you to information about the contents of your warehouse, wherever you may be.

Agilon Mobile is an easy and fast way to:

- Connect your personnel to materials management information and create a streamlined material flow
- Connect various locations and external warehouses to the Agilon system
- Gather transaction and usage data from consumables and materials in external warehouses

- CHECK ITEM AVAILABILITY
- REGISTER TRANSACTIONS
- GET AN OVERALL VIEW OF MATERIALS IN ALL OF YOUR WAREHOUSES

PACKAGES

The Packages feature gives you real-time information on all the materials in your external warehouse.

With this feature, you can:

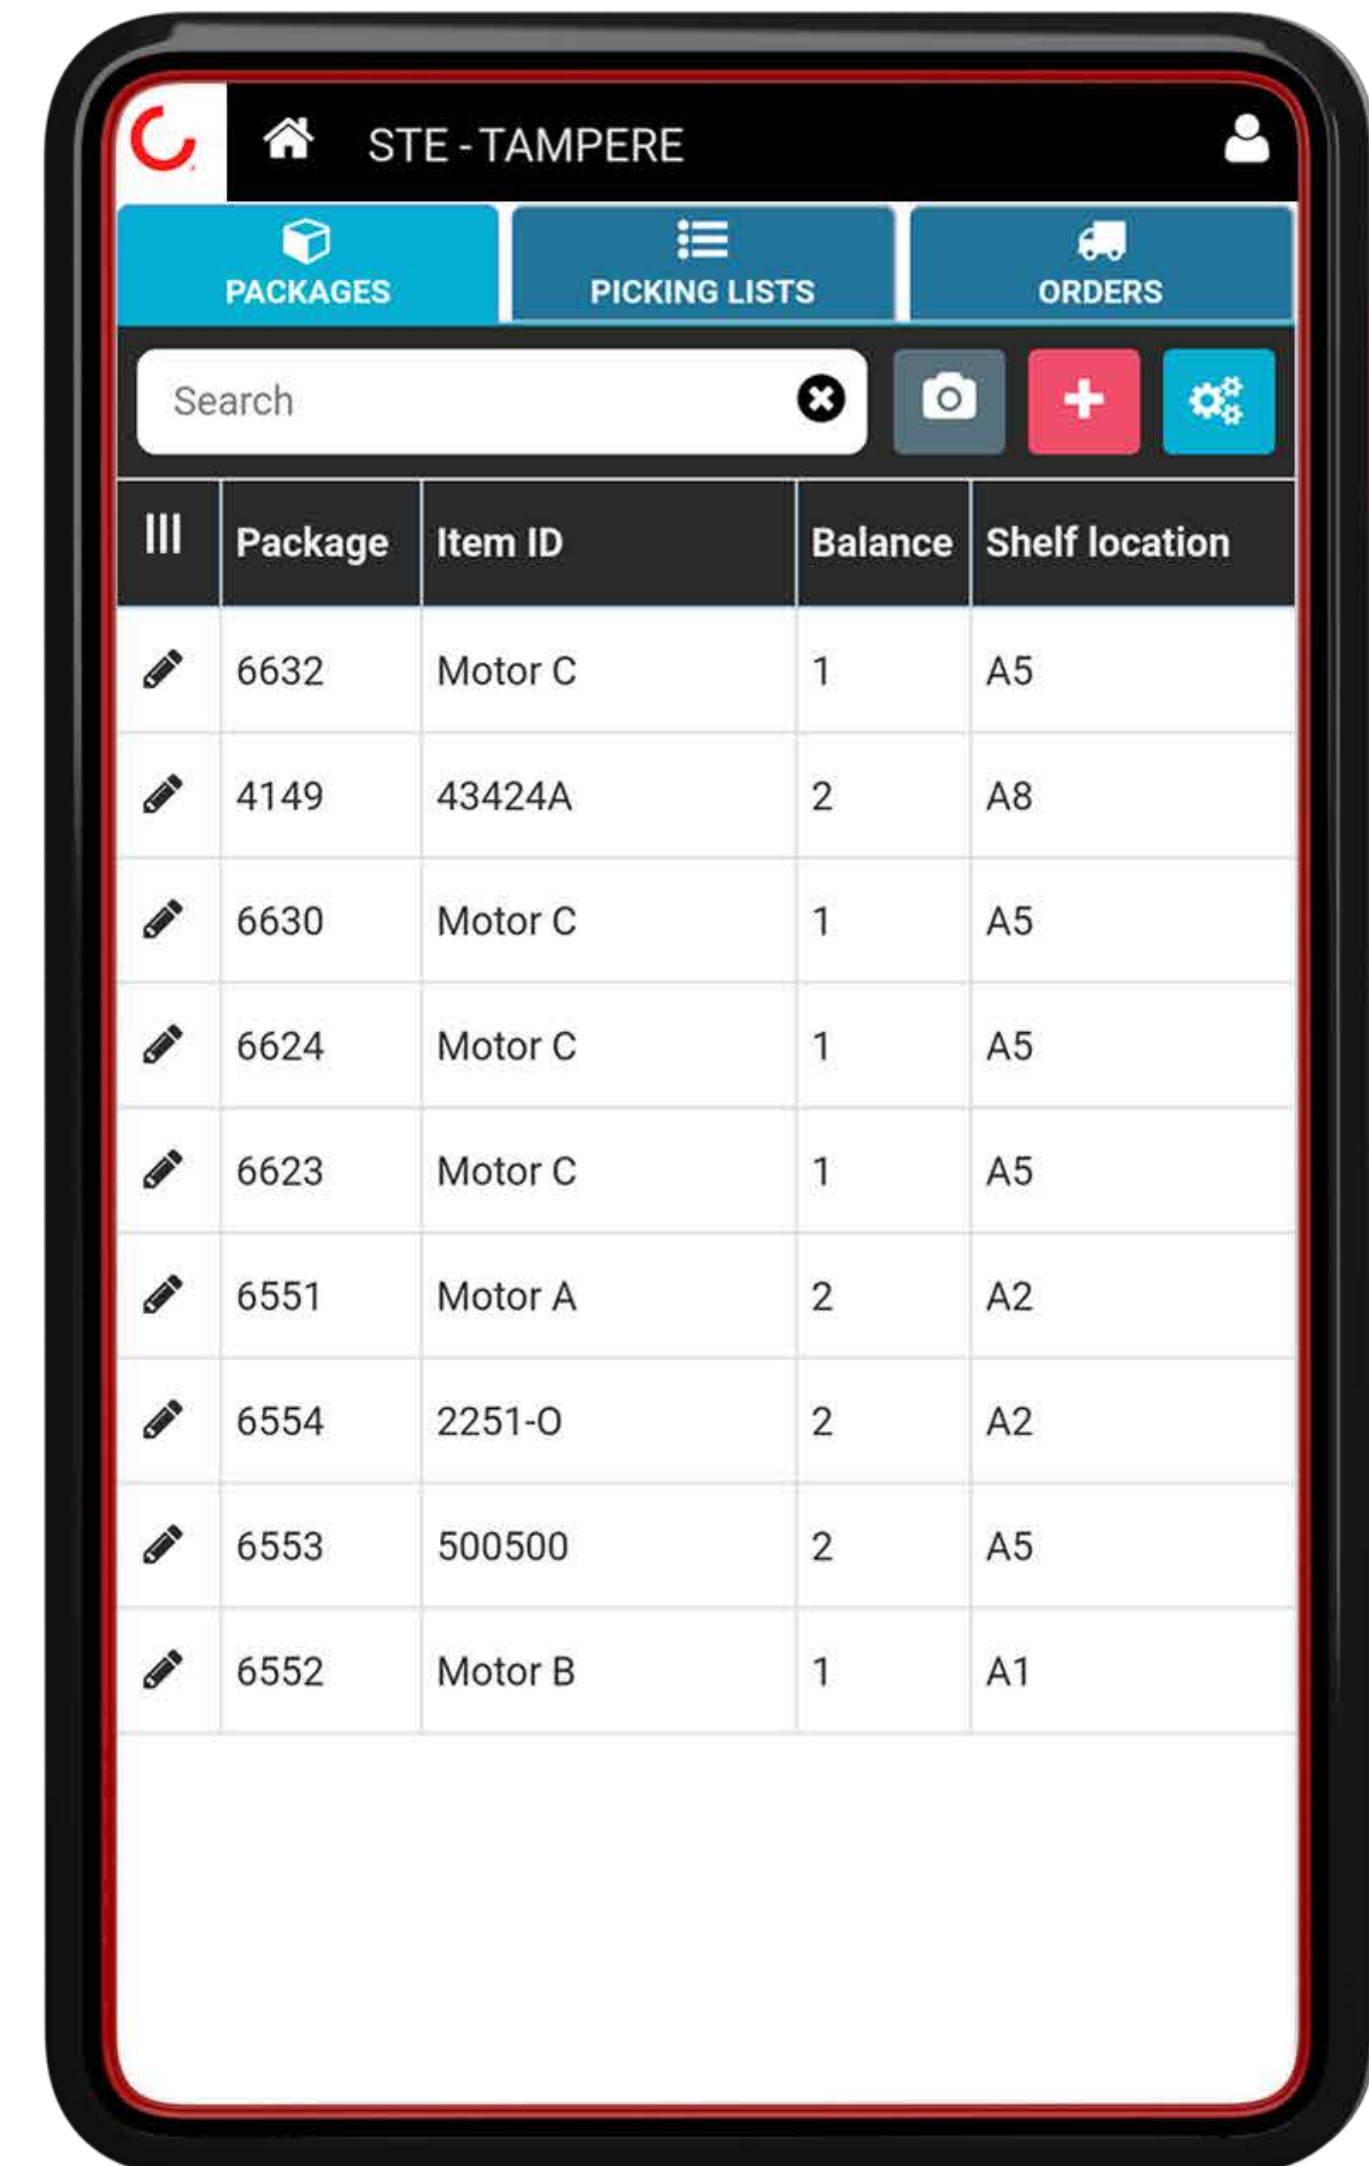

- Add and return packages to the external warehouse or create picking and receiving transactions
- See real-time information on material availability in external warehouses and inside the Agilon shelving systems

POWERFUL SEARCH FUNCTIONALITY

Search covers all item fields. A search can also be done with a barcode.

EASY ACCESS TO PACKAGE INFORMATION

Each package has one row where you can easily find all essential information.

PICKING LISTS

The Picking Lists feature gives you real-time information on orders and/or BOMs to be picked.

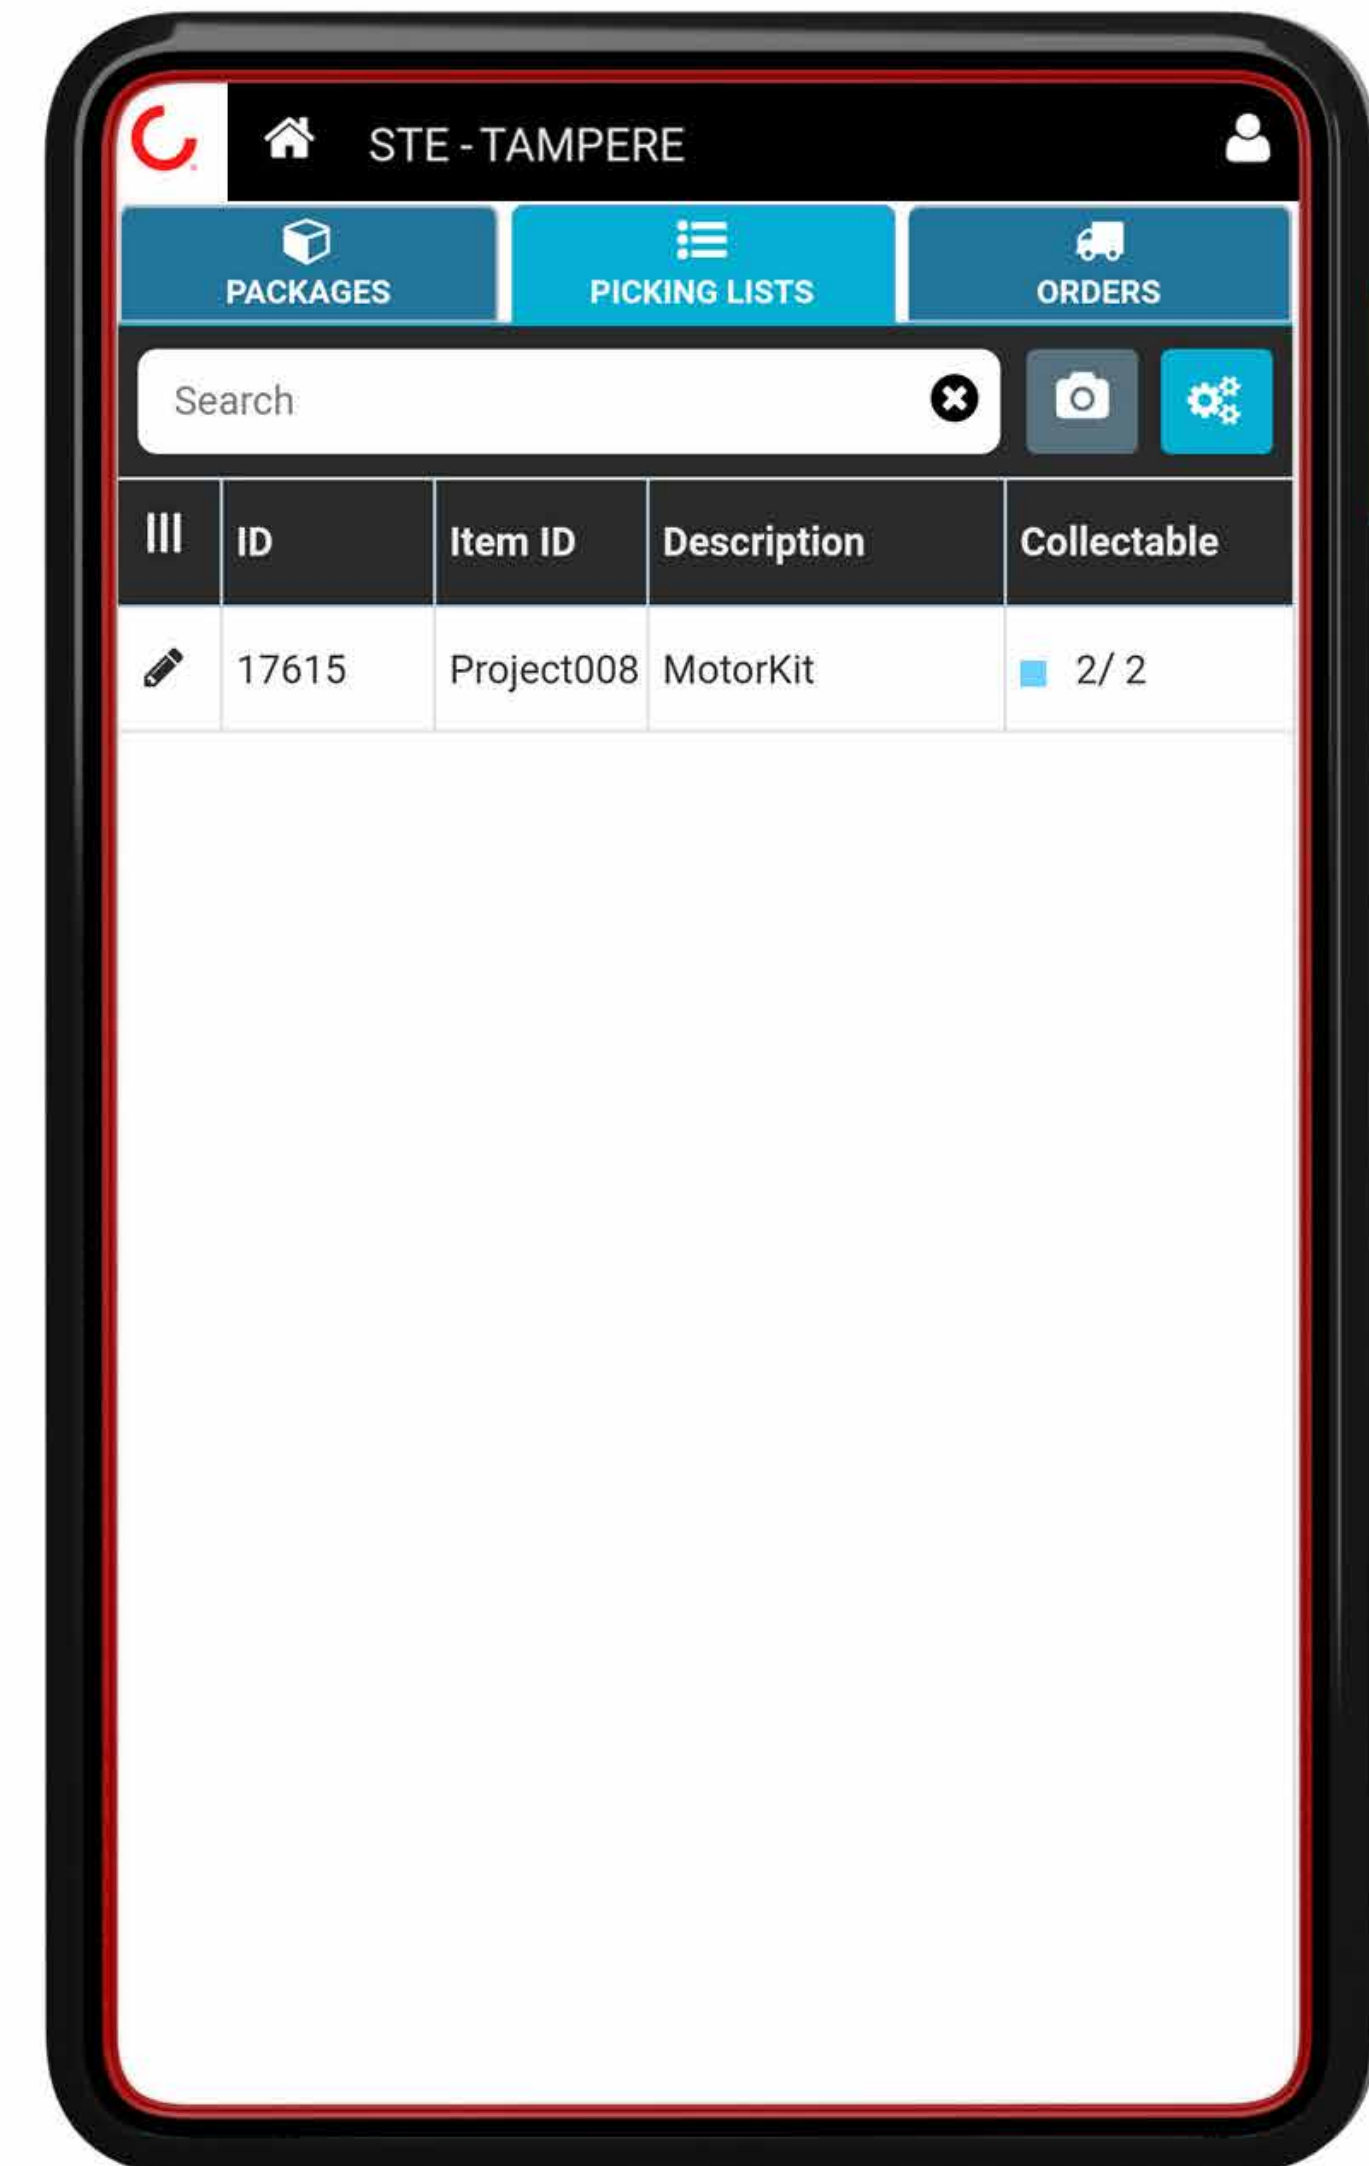

With this feature, you can:

- Monitor picking list line availability
- Confirm picking transactions
- Create electronic picking lists

MONITOR AVAILABILITY

Both order and line-specific availability is easily visible.

Picking lists show what is available for picking across integrated systems.

ORDERS

The Orders feature gives you real-time information on all open purchase order lines to be received into your Agilon or external warehouse.

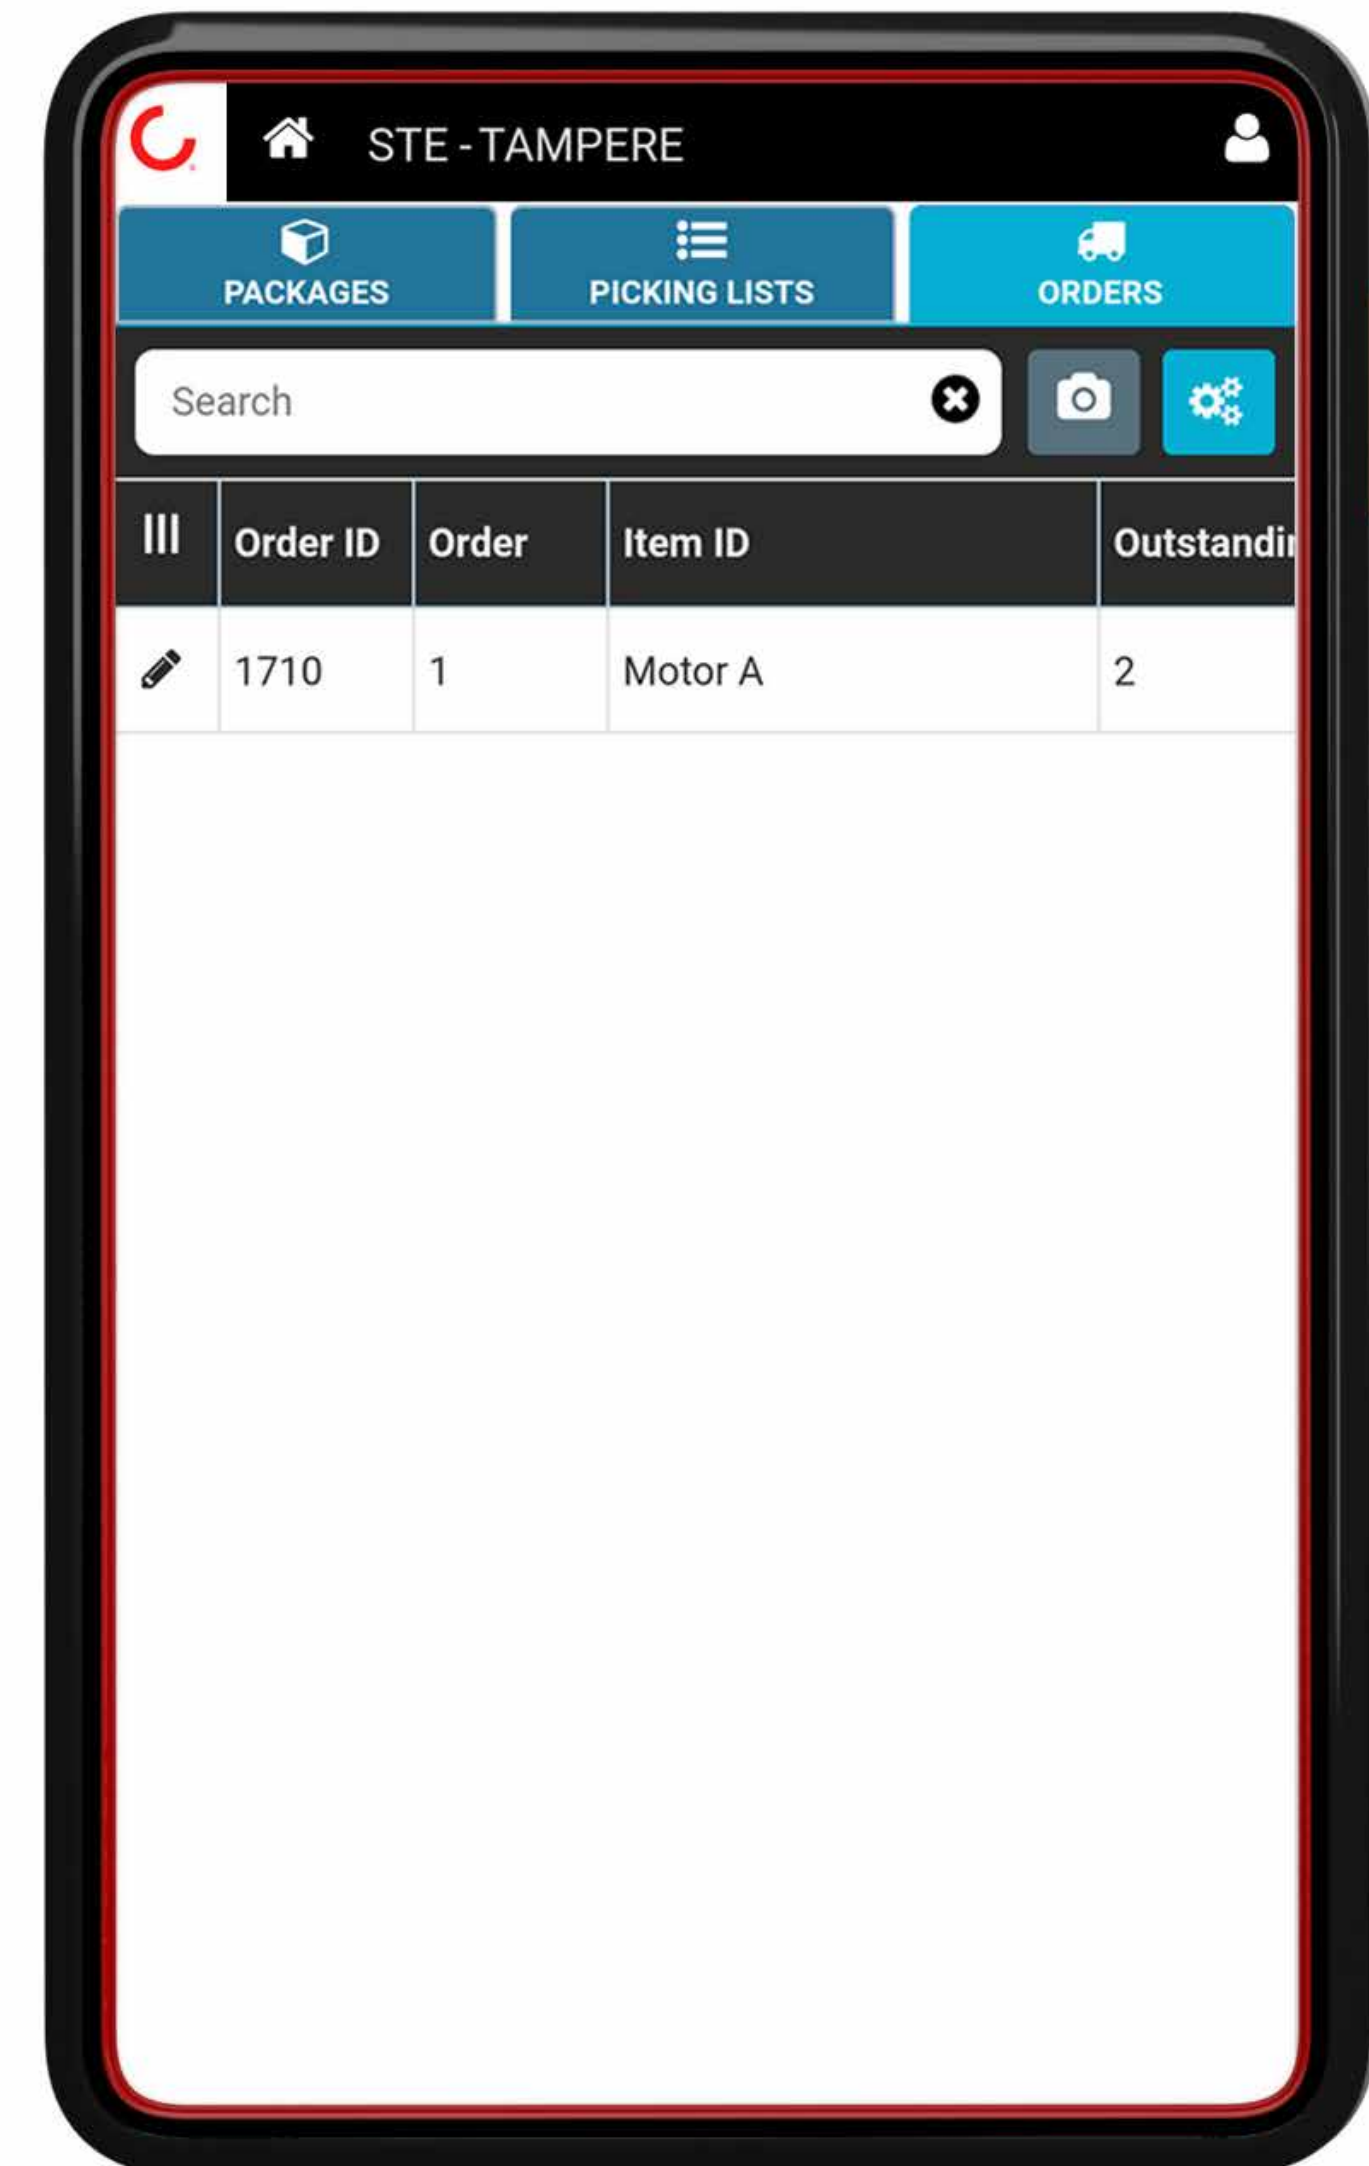

With this feature, you can:

- Confirm receiving transactions
- Monitor open purchase order lines
- Save time – no need for separate confirmation in ERP system

SIMPLE AND DYNAMIC USER INTERFACE

In all tabs, it is possible to select which columns are visible.

Choose the columns you want to see.

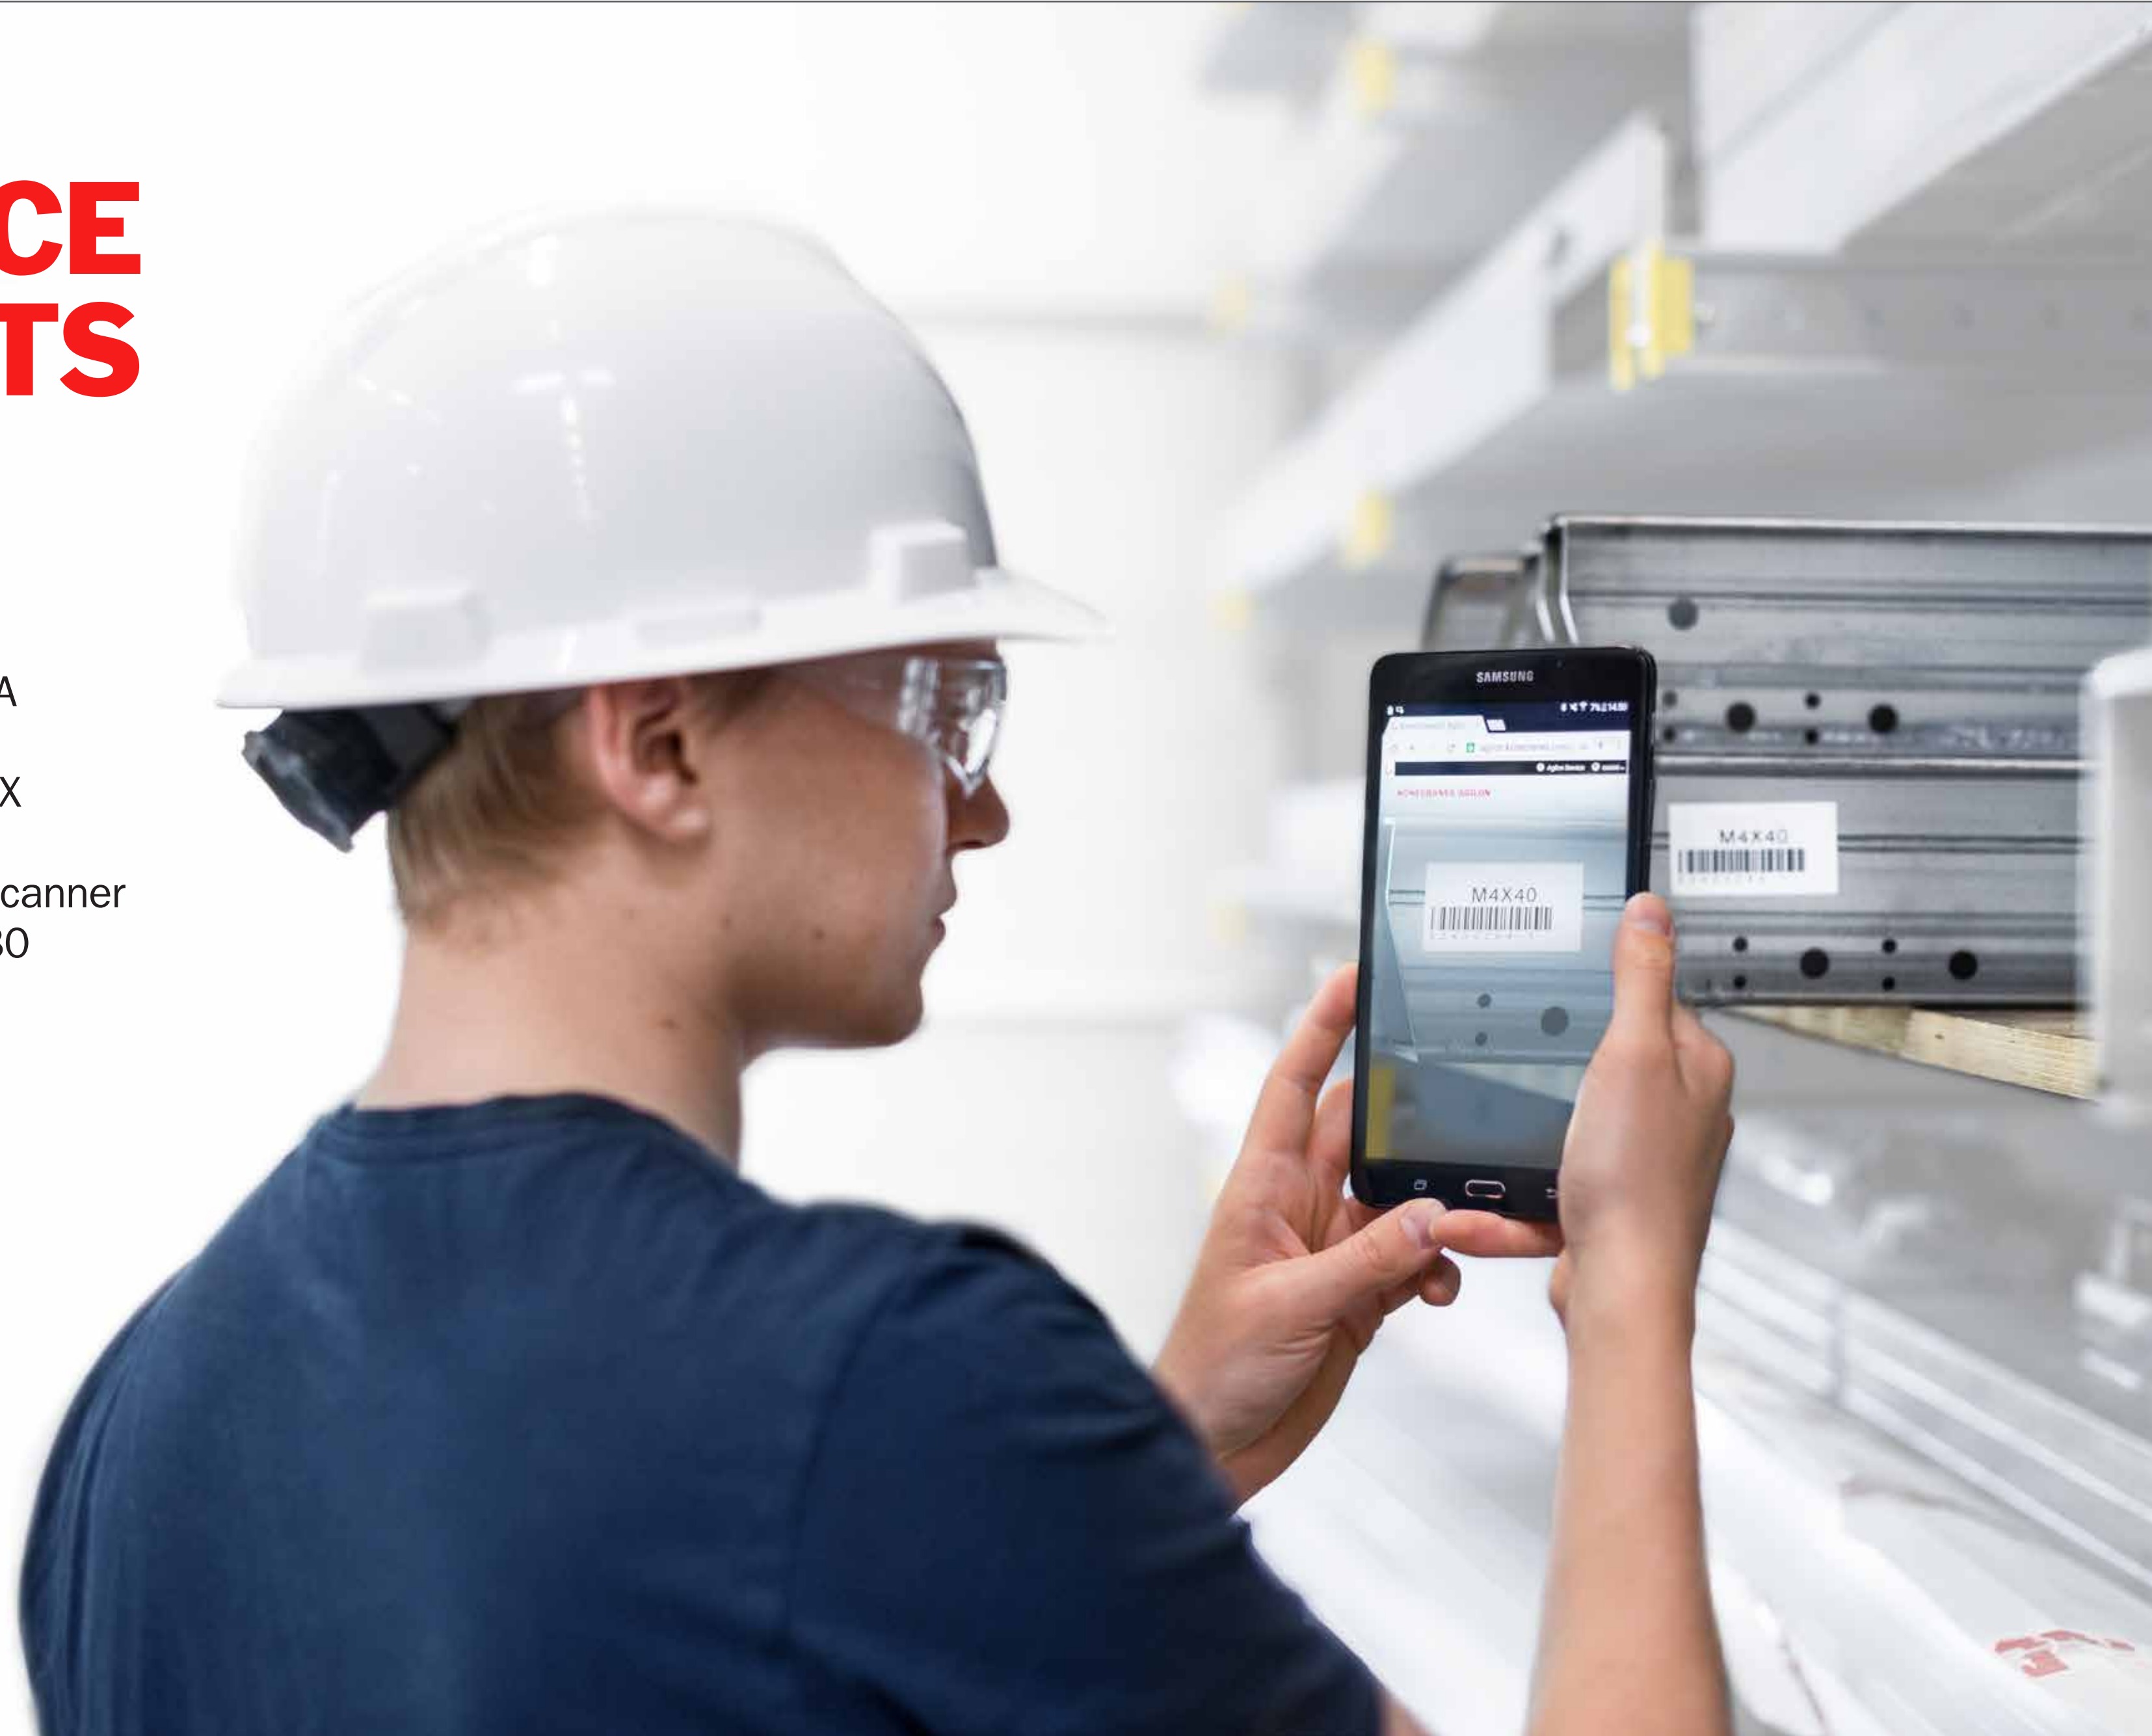

MOBILE DEVICE REQUIREMENTS

Minimum requirements:

- Device: smartphone, tablet or industrial PDA
- Internet access: Wi-Fi or 3G
- Browsers: Internet Explorer 11, Chrome 57.X or later
- 2D barcode scanning: camera or barcode scanner
- Screen resolutions: scales up from 800x480 (smartphone) or 1024x768 (tablet)

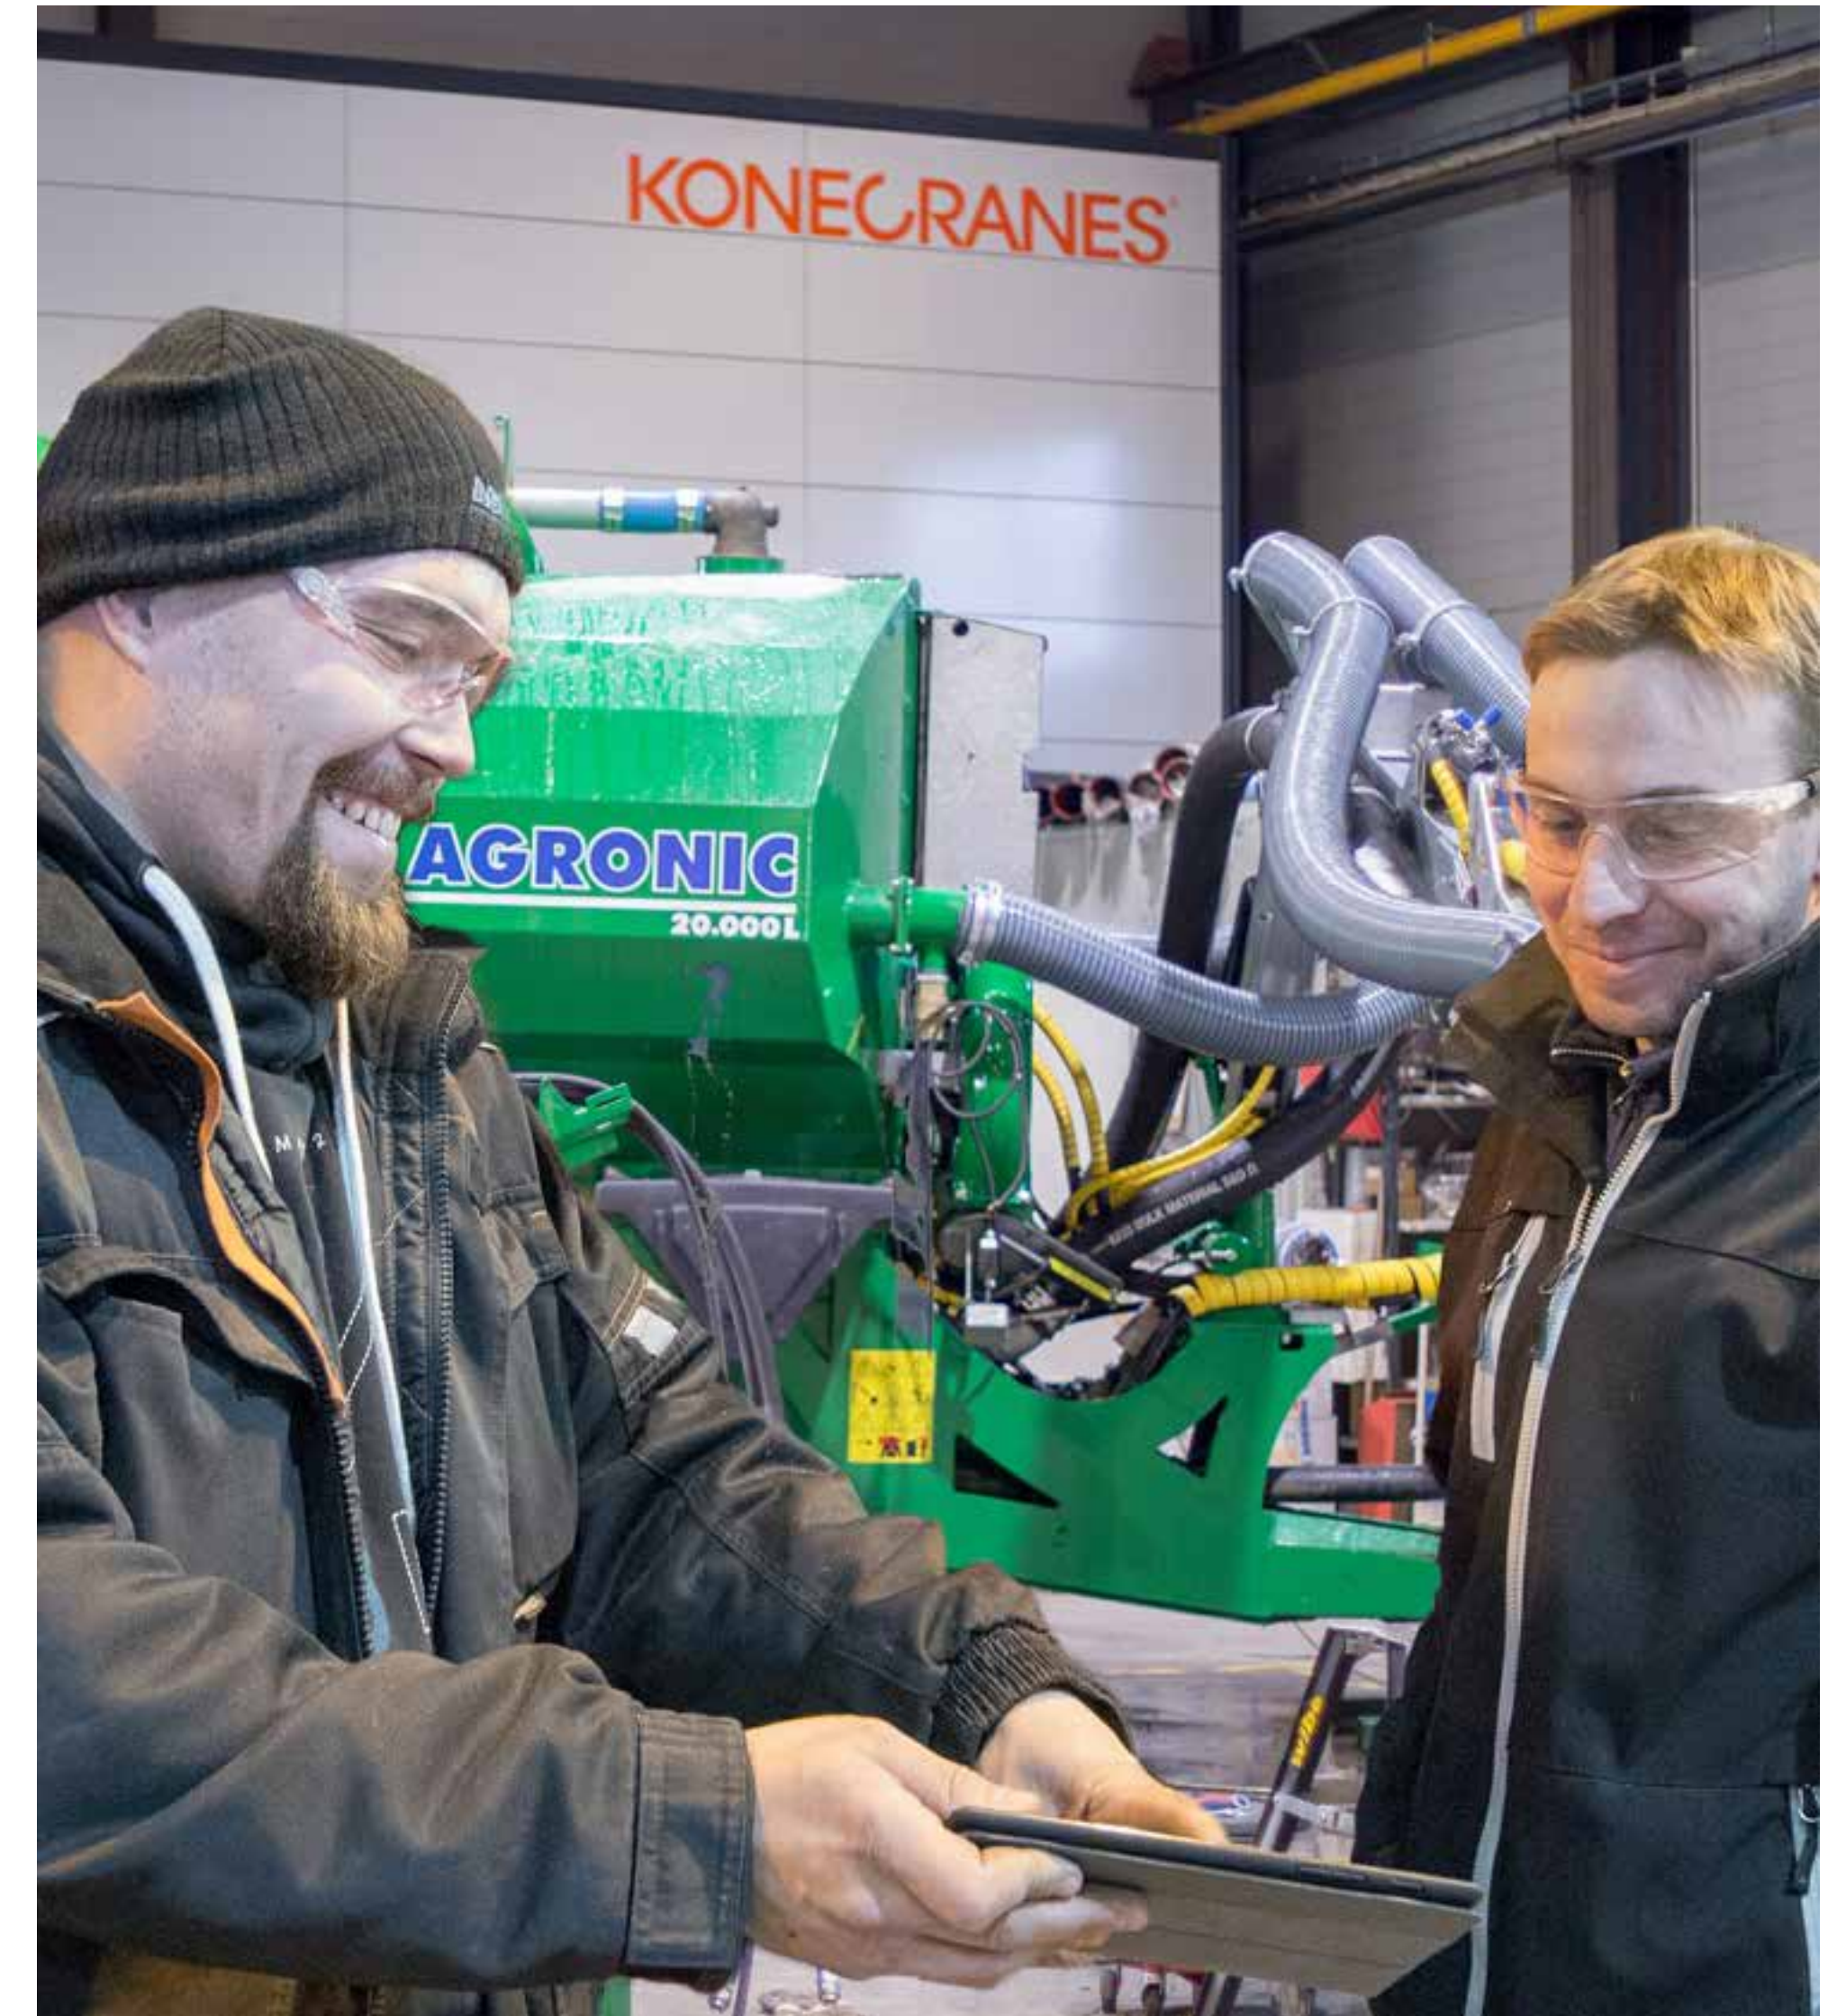

CUSTOMER STORY: AGRONIC LTD.

SIMPLIFIED AND STREAMLINED EXTERNAL STORAGE MANAGEMENT

Agronic Oy leads the slurry tanker market in Finland. The company has been using the Agilon material management system in both of its production facilities since 2014. Today, the company also controls the management of its external storage using the new Konecranes Agilon Mobile interface.

“Agilon Mobile has given us confidence in our product flow. It is no longer necessary to count the products themselves or worry about what products are being ordered – time is saved when weekly or monthly inventory is removed.”

Mauri Autio
Production Manager
