

KONECRANES®

WE MAY NOT KNOW EVERY PART YOU'LL NEED IN THE NEXT SIX MONTHS. BUT OUR AI DOES.

PREDICT & PLAN MHC MAINTENANCE PACK

No delivery wait-times

Minimal down-time

Improved maintenance planning

Bundled offering

Cost-effective

The **Konecranes** data science lab has analyzed material and parts failure data spanning decades, across hundreds of port cranes. Using a combination of models and algorithmic formulas our data scientists built us a tool which can pin-point when material failure, per part, is likely to occur.

We can now predict which mechanical and electrical parts your crane is likely to need at its next service interval.

Buy your tailored spare parts Predict & Plan Pack today, for minimal downtime tomorrow.
