Power Drive for Lift Trucks
SAME POWER
- LESS FUEL

YOU DON'T HAVE TO CHOOSE BETWEEN FUEL SAVINGS AND PERFORMANCE

Konecranes Power Drive is a new option for even more eco-efficient and economical lift truck usage.

Like in all our Konecranes Lift Trucks, the true value lies in the small and intelligent details that make our products one of the world's advanced lift trucks. Power Drive makes no exception – a well-designed option within your lift truck's driveline brings remarkable fuel savings without compromising on the performance. **Additionally it reduces noise level and pays itself back in less than year.**

A LITTLE INVESTMENT BRINGS SIGNIFICANT SAVINGS

By adding a new hydraulic system configuration and optimizing the rpm in addition to a transmission with lock-up function, we have made sure that the fuel consumption is cut whilst the performance is unaffected. By placing the Power Drive system to a new machine, you can save thousands of euros annually compared to lift trucks with normal driveline.

POWER DRIVE VS. NORMAL DRIVELINE

UP TO 10–15 % FUEL SAVING

Maintains the same performance

Payback in about 6 months or less

BENEFITS

- Decreases lift truck fuel consumption and costs
- Reduces noise level
- Less heat in transmission
- Extended lifetime of drive train
- Low investment cost
- Paypack time about 6 months or even less.

AVAILABLE FOR HEAVY MACHINES

Power Drive is available for all Konecranes heavy duty lift trucks that uses a 1.1 liter engine from Volvo.

Fork lift trucks, 37 to 65 tons

Laden container handlers, up to 45 tons

Reach stackers for intermodal handling, 41 to 45 tons
