# KONECRANES

Predict & Plan

RTG Maintenance Pack

- No delivery wait-times
- Minimal down-time
- Improved maintenance planning
- Bundled offering
- Cost-effective

We may not know every part you'll need in the next six months. **But our AI does.**

KONECRANES

Port Parts Packages

All You Need

The **Konecranes** data science lab has analyzed material and parts failure data spanning decades, across hundreds of port cranes. Using a combination of models and algorithmic formulas our data scientists built us a tool which can pin-point when material failure, per part, is likely to occur.

We can now predict which consumable, mechanical and electrical parts your crane is likely to need at its next service interval. Buy your tailored spare parts Predict & Plan Pack today, for minimal downtime tomorrow.

Consumable Parts	1 Year	2 Years	3 Years
Filters	X	X	X
Twistlocks		X	
Ropes		X	

Lifecycle packages	2–4 Years	5–9 Years	10+ Years
Friction materials, Breathers, Fuses, etc.	X		
Disc brakes, Encoders, Controllers, etc.		X	
Motors, Guide rollers, Rail wheels, Gear reducers, etc.			X

Why wait for a breakdown?
