# Quick and easy access to inspection records

Daily inspection records are accessible on the Konecranes Portal, where combined with maintenance history and condition data collected from selected components with TRUCONNECT Remote Monitoring, provides a comprehensive view of the condition of an asset in one easily accessible place. The data assists in planning maintenance actions and provides an audit trail of performed Daily Inspections.

# Digitalize your daily inspections

Konecranes CheckApp for Daily Inspections has been designed to help crane users quickly and easily record their findings when performing pre-shift and/or pre-lift inspections.

CheckApp gives you a digitalized and cost-effective way for recording and retrieving daily inspection data that can be used for internal auditing and compliance as daily inspections are a statutory requirement in several countries.

The daily inspection is a user's—or crane operator's—own assessment of the condition of an asset and environment for safe use. It is not an expert's examination of the condition of an asset or component. Konecranes CheckApp for Daily Inspections follows the guidance set in the ISO 9927 standard and in applicable statutory regulations.

The app can be downloaded for free on the Apple App Store and from Google Play for Android devices. Your personnel can use their own or shared company-provided devices to perform the daily inspections.

## ➔ Benefits of CheckApp
