

# TRUCONNECT Retrofit for Demag cranes

# Get connected to your entire crane fleet

The TRUCONNECT Retrofit for Demag cranes has been designed to equip Demag SafeControl controlled cranes with the necessary hardware needed for TRUCONNECT Remote Monitoring. You can get a more comprehensive fleet view when your Demag SafeControl equipped assets are added to the same remotely monitored fleet with your Konecranes assets.

TRUCONNECT Remote Monitoring provides real-time crane condition and usage information giving you the visibility you need to fully understand the day-to-day use of your cranes. Your TRUCONNECT data combined with inspection and maintenance information can help you make informed decisions on maintenance, safety concerns, productivity, training, and service and equipment investments.

You can see your TRUCONNECT data summarized in easy-to-read graphs and charts on the Konecranes Portal. If you have a Konecranes service agreement you can also see reports from your service visits, open safety and production risks and even an overview of spend by service type.

## Benefits

- Easy-to-follow instructions and complete hardware kit allow for quick installation by in-house maintenance teams.
- Hardware attachments and antennas are specifically designed to fit Demag DR and DMR hoists and cranes.
- Monitors the same data points as Demag StatusControl 2.0.
- No configuration or access to a local WiFi network is needed as data communications is via 3G/4G network.
- No hazy data conversions as data is collected directly from Demag CAN bus.
- No personal/privacy data is collected.
