YardPC retrofit pack

**As technology
advances so must we!**

Because the previous
YardPC model has
become obsolete,
replacement units are
no longer available.

However, there is a solution:
A new retrofit pack that works with all previous models.

In the absence of direct replacement unit, this retrofit set consists of several components which are presented in the table and photograph below.

Pack part number: 67832989

Description	Quantity
IPC427E with software	1
Mounting bracket	1
Power supply unit	1
Communication cable	2
Converter with software	1

Some points

- YardPC is a critical component
- Breakdown will stop the crane
- All items are in Konecranes stock and can usually be shipped within a week
- No need to replace existing working units

If you have any questions or should you encounter difficulties, please contact your nearest Konecranes Ports Services branch.
